08 Quick reference

Start here — the portal shell

Where to go. The Admin Portal lives at mdo.timothystl.org/admin.html. It's a full desktop experience — a laptop or tablet in landscape is the best fit, though a phone works too.

The admin portal has **seven tabs** down the left sidebar: **Director**, **Classrooms**, **Staff**, **Finance**, **Planning**, **Market Analysis**, and **Settings**. Below 900px screen width the sidebar becomes a hamburger menu with the same seven tabs inside.

Each tab works the same two-level way:

- **Dashboard** — the tab's landing view: key numbers, a "Needs you" action queue, and shortcut pills into the tools that explain those numbers. This is what you land on every time you open a tab.
- **Detail** — a specific tool, open and in focus. The sidebar stays visible and highlights where you are, with a **Related** row of nearby tools at the bottom — there's no separate "back" button because the sidebar always shows the way out.

Director owns no tools of its own. It's a pure dashboard — every link on it opens the real tool under its actual home tab, so the sidebar always shows you where a thing actually lives rather than keeping a second index to remember.

Sign in

The screenshot shows a web interface for signing in to the myMDO Admin system. At the top, the logo reads "myMDO Admin" with a yellow dot, and below it, "Timothy Lutheran Church". In the center, there is a shield icon with a person and a lock, followed by the word "Admin" and the text "Sign in to your account". Below this, there are two input fields: "Email" with the placeholder "admin@example.com" and "Password" with the placeholder "Password". A purple "Login" button is positioned below the password field. At the bottom, there is a link for "Forgot password?" and the text "Timothy Lutheran Church".

Admin sign-in at mdo.timothystl.org/admin.html

1. Go to mdo.timothystl.org/admin.html.
2. Enter your **admin email** and **password**, then tap **Login**.
3. Use **Forgot password?** if needed — a reset link is emailed to your account.

Admin accounts are created and role-assigned by the director, not self-registered. Ask the director for an account if you don't have one yet.

The Director dashboard

Director dashboard: the "Needs you" queue and the week's key numbers

1. The **Needs you** panel at the top is a single action queue — day-off requests, incident reports awaiting your sign-off, unread messages, and staffing warnings all land here, most urgent first. Each row has its own inline button, so you can clear it without leaving the page.
2. Below that, the **metric cards** show the week at a glance: the staff schedule by day, days off waiting on you, unread messages, seats open this week, and what's billed so far this month.
3. Tap any card's link (for example **Build staff schedule** or **Review and send**) to jump straight into the tool that explains that number.
4. Further down, **Staff needed this week** and **How full each room is** summarize the classroom picture, and **Next up on the waitlist** shows who's waiting.

These are the same numbers everywhere else in the app. The dashboard never computes a figure of its own — it reads the exact same registrations, invoices, and schedules the detail tools use, so the numbers here and the numbers in a tool can never disagree.

Classrooms — Attendance Board

The screenshot shows the 'Admin Dashboard' for 'myMDO Admin' (Timothy Lutheran Church). The user is signed in as 'Director'. The top navigation bar includes 'Classrooms' and 'Logout'. The left sidebar lists various functions: Director, Messages, Classrooms (highlighted), Staff, Finance, Planning, Market Analysis, and Settings. Below these are sections for 'DAILY' (Print Attendance, Attendance Board, Incident Reports, Fire Drills, Classroom Roster), 'PLANNING' (Enrollment & Capacity), and 'RECORDS' (Care Calendar, Missing Care Calendar). The main content area displays summary tiles for 'HERE NOW' (9), 'NOT IN YET' (2), 'MARKED ABSENT' (1), 'RATIO WATCH' (OK), and 'ALLERGIES PRESENT' (3). Below these are two room cards: 'Bee Room' and 'Owl Room'. The 'Bee Room' card lists Emma Lee (Peanut allergy), Noah Patel, and Ava Thompson, each with 'In' and 'Out' buttons. The 'Owl Room' card lists Liam Carter and Sophia Diaz, each with a green 'In' button showing the time (8:05a) and an 'Out' button. A 'RELATED' section at the bottom includes links for 'Print Attendance', 'Incident Reports', 'Fire Drills', and 'Classroom Roster'. A red circle with the number '2' is in the top right corner, and a red circle with the number '1' is next to the 'Out' button for Sophia Diaz.

Attendance Board: office view of who's checked in, by room

1. From the sidebar, open **Classrooms → Daily → Attendance Board**.
2. The summary tiles at the top show who's here now, who hasn't arrived, who's marked absent, and whether any room is at its staff-to-child ratio limit.
3. Each room card lists its children with **In / Out** buttons and an allergy flag where one applies. This mirrors the same check-in record the classroom's own Staff app writes — marking a child here or on a teacher's phone updates the same record either way.
4. Use **Move →** on a child's row to move them to a different room for the day.

The other Classrooms tools follow the same "office view of a real staff workflow" pattern: **Incident Reports** and **Fire Drills** let the director file a report or log a drill directly, in addition to reading what staff filed from the floor.

Care Calendar & registrations

The screenshot shows the 'myMDO Admin' interface for Timothy Lutheran Church. The top navigation bar includes 'Admin Dashboard', 'Classrooms', and 'Logout'. The user is signed in as 'Director'. The left sidebar contains various menu items: Director, Messages, Classrooms (highlighted), Staff, Finance, Planning, Market Analysis, Settings, and a 'DAILY' section with Print Attendance, Attendance Board, Incident Reports, Fire Drills, and Classroom Roster. Below these are 'PLANNING' (Enrollment & Capacity) and 'RECORDS' (Care Calendar, Missing Care Calendar). The main content area features a search bar, a month selector (September 2026), and a table of registrations. The table has columns for PARENT, CHILD / ROOM, PATTERN, BILL, and ACTIONS. Three rows are visible, each with an 'Edit days' button. A 'RELATED' section at the bottom includes links for 'Missing Care Calendar' and 'Family Directory'.

PARENT	CHILD / ROOM	PATTERN	BILL	ACTIONS
Jordan Lee (555) 010-0142	Emma Lee Explorers	M/W/F	\$245.00	Edit days
Priya Shah (555) 220-8834	Aria Shah Bee Room	Tu/Th	\$196.00	Edit days
Marcus Webb (555) 771-2290	Theo Webb Bear Room	Daily	\$410.00	Edit days

Care Calendar: every family's registration, searchable and editable

1. Open **Classrooms → Records → Care Calendar** for the full list of registrations — search by child, parent, or email, and filter by month.
2. Each row shows the parent's contact info, the child and room, a computed **pattern** summary (which weekdays are booked), and the current bill.
3. Use **Edit days** to open a child's calendar and add or remove care days. Billing recomputes automatically from the child's real registered days — there's no separate "add a charge" step to keep in sync.

Missing Care Calendar, right next to Care Calendar in the sidebar, flags children whose registered pattern doesn't match what's actually been booked

for the upcoming month — useful for catching a family who forgot to register before the month starts.

Staff, Finance, Planning, Market Analysis, Settings

Staff

Build Staff Schedule is the weekly room/shift grid, with a By-worker view and the week's staffing requirement side by side. **Staff Roster** holds the team directory. **Payroll** covers pay periods, PTO policy, and time-clock settings. **HR & Handbook** holds policies, write-ups, and staff injury reports.

Finance

The **Bookkeeper** tab is the single source for money: an Overview with the annual budget and year-over-year comparison, Accounts Receivable, Room P&L, Month-End Close, Reconciliation, and a GL Export. **Invoices** is where a drafted bill actually gets issued — *Email invoices* sends it and starts aging it as receivable; *Mark sent (no email)* does the same when a bill went out another way.

An invoice sitting in draft is not yet a bill. The Accounts Receivable "owed" figure only counts invoices that have actually been sent — review and send drafted invoices regularly so the numbers the office sees match what families have actually been shown.

Planning

Enrollment outlook, room capacity modeling, and What-If scenario/enrollment planning tools live here — useful for a rate change or a "what if we opened a new room" question.

Market Analysis

Compares local market position, pricing, and cost context — full-role access only.

Settings

Room rates and capacity, registration rules, closures, admin roles and access, enrollment forms, provider tax details for the year-end statement, and the ChMS finance API connection all live under Settings as one continuous page — there's intentionally no second sidebar level inside it.

Admin roles & access

Every admin account has one of three access levels:

- **full** — unrestricted access to every tab and tool.
- **restricted** — day-to-day scheduling and classroom tools, without Finance, Payroll, Staff Roster, or the more sensitive Settings sections.
- **staff** — Classrooms tab only, and read-only there.

Roles are managed under **Settings → Access & oversight**. If a tool you expect to see is missing from the sidebar, check your assigned role there before assuming something is broken.

Admin quick reference

I need to...	Go to
See what needs my attention today	Director dashboard
Check who's checked in right now	Classrooms → Attendance Board
Add or change a family's care days	Classrooms → Care Calendar → Edit days
Approve a staff day-off request	Director dashboard, or Staff → Build Staff Schedule
Send this month's invoices	Finance → Invoices → Email invoices
Review what's owed and aging	Finance → Bookkeeper → Accounts Receivable
Sign off on an incident report	Classrooms → Incident Reports
Change room rates or ratios	Settings → Rooms & rates
Add or change an admin account's access	Settings → Access & oversight
